Subject: RE: Microair Avionics T2000SFL Transponder

Dear Mr. Mugan,

After internal discussion, the CAA-NL came to the conclusion that CAA-NL can and will except the Microair Avionics T2000SFL Transponder without further validation activity. The configuration of the Transponder must be in accordance with the LBA JTSO No. 10.930/066

This conclusion is based on the existing of a LBA JTSO and (very important)the EASA commission regulation (EC)No 1702/2003 article 2.13

Regards  
Bernard van Stam
